

Inside Inspiration

Visual Facilitation

How to facilitate groups to engage everyone, stimulate ideas, innovation and discussion, drive action and deliver FAST results!

Real success and innovation comes from genuine collaboration, contribution and planning with people. Truly effective facilitators know how to efficiently manage the environment, content, process and people in a meeting to stimulate the meaningful discussion and sharing of ideas needed to ensure the most **successful outcome** in the shortest possible time.

Our skilled facilitators use the latest technology, tools and processes in group facilitation techniques to harness the maximum buy-in, contribution, innovation and synergy from every group in the shortest possible time.

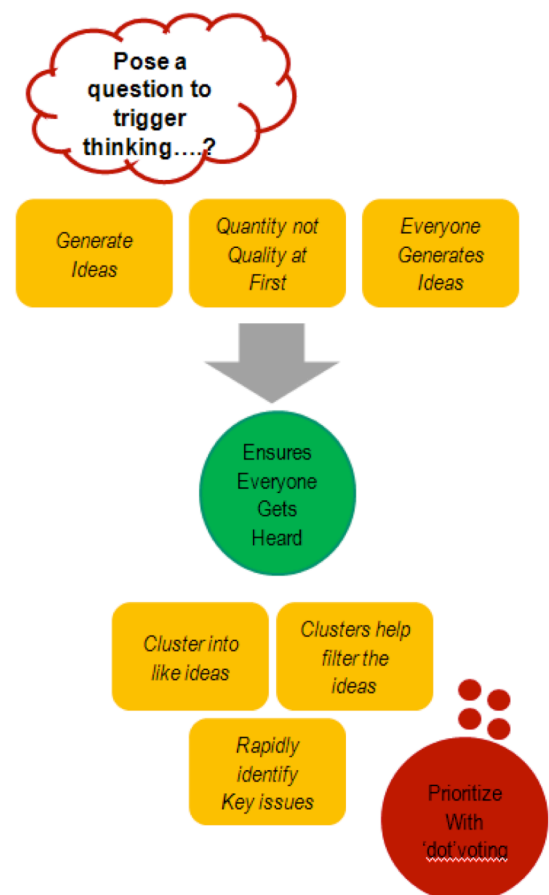

Because all group members actively participate simultaneously, there is greater speed, momentum and responsibility for achieving the outcome.

This ensures your time and money is well spent and your people walk away with the specified outcome, clarity and buy-in necessary to implement the agreed action plan.

*'We achieved in two days what would have taken us six months on our own'.
CEO, Non-Profit Health Organisation*

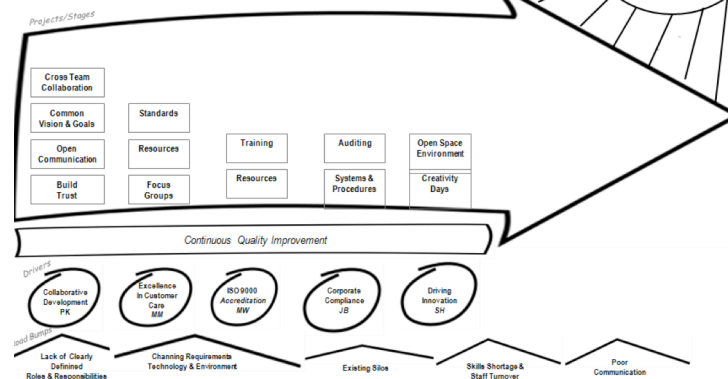

Visual Facilitation will...

- Rapidly create a fun, stimulating and interactive environment that encourages innovation, imagination, sharing and collaborative discussion
- immediately engage and empower your people with the opportunity to easily and effectively contribute to the discussion and visual communication process
- utilise innovative techniques that uncover the truth about **what everyone is really thinking and feeling**, regardless of who is in the room
- build relationships and enable the group to quickly work through complex content and large amounts of information
- Cut through politics, status quo and dominant personalities to ensure key issues are addressed in-depth and honestly by everyone
- capture the best collective thinking, ideas and buy-in of the group in a highly visual, flexible and innovative format
- produce a succinct, visual, results focused and meaningful output for action.

Successful Applications

- Strategic Planning
- Process Improvement
- Collaborative Planning / Brain Storming
- Decision Making
- Co-Creation of Solutions / Problem Solving
- Innovation Workshops
- Facilitated Focus / User Groups
- Up skilling *In-House* Facilitators

Our Tools and Methods

Our approach and system is based on 'visual mapping', 'participative planning' and the 'moderation method' for interactive group work. We ensure a creative, yet structured visual dialogue process. Our kit includes proven Visual Templates to work towards together with the 'Think Pod' and Neuland Sticky Walls'.

Our stationary includes a selection of colourful cards in different shapes and sizes with specifically assigned purposes. Cards are repositionable for flexible review and re-ordering or prioritising of key points, issues, ideas and actions.

All tools used support and enhance the art and practice of staff engagement, interactive learning, professional facilitation, visualisation, team building, accelerated collaboration and organisational development.

Size of groups

The ideal group size is 8 to 20, however we can cater for groups of 3 to 70! Specific techniques are employed for larger groups to avoid duplication and still ensure everyone contributes to a successful result.

Time and timing

Facilitated workshops can be from 2 hours to 3 days depending on your needs and objectives.

Costs

Costs are dependent on time allocated to the workshop, stationery required, travel and accommodation requirements.

Next Steps

Let's review your needs and plan a Power Facilitation session with your team or selected stakeholders. This will allow you to experience this unique process and achieve a significant outcome or desired result for your group.
